

Telescopic rams

5000 series

Spot on!

Our new 5000 series telescopic rams

Lighter and more ergonomic than ever, improved performance. With LED lights at the front and back and a laser pointer to help you hit the right spot in one go.

Meet our new telescopic rams

When it comes to the crunch you can count on Holmatro rescue tools. The most important goal in the development of our 5000 series telescopic rams was weight reduction, without compromising tool performance. The result? Three telescopic rams that are lighter and longer than ever, with more power being added to the second plunger, where you actually need it the most.

All models are ergonomically designed, with new carrying and control handles for better grip. In addition, LED lights at both the front and back of the tool ensure you always have a well-lit working area. Finally, an integrated laser pointer for first-time-right positioning provides a visible indication of where your ram head will contact the vehicle once extended. This saves time and is safer for the patient.

So no matter what challenge you face, our new 5000 series telescopic rams help you do your job safer, quicker and easier.

Features & benefits

This is what makes the new 5000 series telescopic rams so unique

New control handle

Improved ergonomic design, offering better grip for optimal tool control.

Integrated laser pointer in ram head - Patent pending

Marks the exact spot where the ram head will contact the vehicle once extended. Facilitates first-time-right positioning, which saves time and is safer for the patient.

Built-in Speed Valve

When unloaded, the plunger extends quickly to the desired distance to speed up positioning of your ram.

Integrated LED lighting

A total of 6 LED lights illuminate both the plunger side and the base side of the ram, giving you a clear view of your working area. Day or night: start right away without being hindered by your own shadow.

Ergonomic carrying handle

New design for balanced carrying of your ram. Mounted parallel to the tool, minimizing storage dimensions.

Lightweight

Lighter than ever, thanks to new materials, component integration and smart design. Very easy to carry and handle, reducing physical strain.

Improved performance

Increased spreading force of the second plunger (where you need it the most!) and more length to expand your options during extrication.

Telescopic rams

- Weight 9.2 - 16.9 kg
- Retracted length 335 - 635 mm
- Extended length 610 - 1510 mm

About Holmatro

For half a century, Holmatro has been developing, producing and testing high-pressure hydraulic equipment for industrial, rescue and tactical applications. Based on the needs of users, our products are known for their high quality and innovative technology. Holmatro sells and services these products through offices in various countries and an extensive dealer network.

When it comes to Holmatro rescue equipment, our highly experienced engineers translate innovative ideas into lighter, more powerful solutions for fire and rescue departments. The result is a full range of high-quality tools that enable you to work efficiently under pressure. With Holmatro it is safer, easier and quicker to save lives.

Holmatro products are manufactured in the Netherlands and the USA at our state-of-the-art production facilities. Innovation, quality and service are at the heart of our company philosophy. Thanks to an extensive range of services including maintenance and training, our products last for years. That is why they are the tools of choice for rescue workers throughout the world. Once you use them, you'll use them for life.
