2020 TOOL BOARD PRICING GUIDE

PRICING GUIDE FOR WALL MOUNTED,
SLIDE-OUT AND SWING-OUT TOOL BOARDS

TOOL MOUNTING SYSTEMS
PACTOOLMOUNTS.COM

TRADITION - SAFETY - VALUE

We believe in our product, and so do many large Municipal Fire Departments around North America!

Install PAC tool boards and brackets on your engines and you'll soon learn the simplicity, time savings and value that PAC tool mounting systems offer. Your crew will quickly learn the benefits of having secured and organized tools, too!

PAC products are designed to **protect your crew** from falling tools, to **provide the quickest response** and to **keep your tools secured** during transport.

When a truck has no organization, it is impossible to know what you have or don't have. A truck organized with PAC products will **LOSE LESS TOOLS!** When you respond to a call, make sure you and your tools are ready!!

This new brochure was developed to help OEMs, Dealers and Fire Departments understand and our various tool board products. We hope you find it useful - whether to spec a new truck or just looking to overhaul and organize your fleet.

Have questions? We're here to help! Email or call our knowledgeable staff. We also offer free, video conferencing to help solve your tool mounting issue.

Thank you!

Greg Young, VP
